EAST ANGLIA'S LEADING MULTI-SERVICE CONTRACTOR

Established in 2007 as a demolition and asbestos services company, Anglian has always had firm foundations in the construction industry. Over the past 17 years, we have expanded to offer additional specialist divisions including scaffolding, earthworks and waste recycling. This enables us to provide clients with the full range of services for their projects or the opportunity to utilise the skills of our individual divisions as required.

Anglian offers the complete range of services including:

- Demolition
- Waste management
- Asbestos surveys and removal
- Scaffolding
- Earthworks and remediation

Operating from our 10-acre licensed site in Attleborough, just off A11, today our Group includes East Anglia's fastest growing waste management company and metal recycling facility.

Anglian is founded on a wealth of skill, experience and passion which runs throughout every division. We are extremely proud to be experts in our field, holding a raft of top industry accreditations.

DEMOLITION

Anglian has a longstanding heritage in demolition. Our services including dismantling, traditional demolition, high reach demolition and internal strip-out, for a vast range of private and public sector clients. Using the latest plant and equipment, projects cover all manner of properties from commercial offices, factories, retail units and even lighthouses.

Our expert team are experienced in handling even the most complex projects, and have specialist knowledge in other key associated

areas such as earthworks and remediation.

We are also committed to minimising the impact of demolition on the environment. By utilising Anglian's waste recycling division, we ensure materials are correctly segregated on-site before being sent to our facility for processing. This enables us to maximise the amount of materials that can be recycled or looped back into the circular economy from every site we work on.

- High reach
- Dismantling
- Traditional demolition
- Internal strip-out
- Soft strip

WASTE MANAGEMENT

East Anglia's fastest growing waste management company and metal recycling facility, Anglian is helping businesses and organisations to reduce costs, recycle more, improve their environmental credentials and divert waste from landfill.

Offering a total waste management solution, our services include bin collections for general waste and recyclables including glass, paper and food waste, for businesses of all size and in all industries. We also provide skip and RORO hire, as well as a metal recycling service.

Anglian's dedicated waste division operates from a licensed 10-acre

site in Attleborough, Norfolk, where we process waste for recycling or transforming it into raw materials and resources to be looped back into the circular economy. Food waste is sent locally for anaerobic digestion which generates gas for nearby homes.

The waste process at Anglian is transparent and traceable, and we are proud to show exactly where everything goes. We work in partnership with our clients at every stage of their waste journey, from audits and staff training to monthly reporting which helps to benchmark and further improve their recycling rates.

- Total waste management
- Free waste audits
- Recycling and disposal
- Skip hire
- RORO hire
- Metal recycling

ASBESTOS SURVEYS & REMOVAL

With more than 17 years' experience as an asbestos surveys and removal contractor, Anglian is a trusted pair of hands.

An HSE licensed removal contractor and member of ARCA, we offer the complete range of asbestos services including surveys and removal, as well as encapsulation when it is not possible to safely take out the material.

Our expert team holds a P402 qualification. We can undertake licensed and non-licensed asbestos

removal for properties of all sizes, from small residential to large, complex commercial buildings.

In addition, Anglian utilises the latest technology for recording and storing asbestos documentation on each job. We are the only company in the region to be using an innovative QR code labelling system for important project files including the asbestos register. Ensuring documents are easily accessible on-site and fully updated, our QR code system also cuts down on paper.

- Surveys
- Removal
- Encapsulation
- Bulk sampling
- Lead paint testing
- Pigeon guano removal

SCAFFOLDING

Servicing domestic and commercial clients across the region, Anglian's scaffolding division is run by a highly experienced team who have undertaken some of the most challenging projects.

We provide the complete range of scaffolding services for restoration and commercial maintenance projects, public buildings, structures and access points, as well as an aid during demolition works

and on full facade retention for major redevelopment projects. Our team is skilled in design to create the best possible structures which allow safe and effective working on a vast range of sites.

We are a member of the Scaffolding Association and an NASC compliant company. The entire scaffolding workforce is CISRS trained – from labourers to inspectors, offering unrivalled expertise and workmanship.

- Access points
- Facade retention
- Maintenance contracts
- Restoration projects

EARTHWORKS & REMEDIATION

Anglian's highly experienced earthworks division can undertake various remediation and reclamation disciplines, turning contaminated brownfield sites into viable building land or returning land back to its original state.

We provide the complete range of services but follow a bespoke approach to every project. Our scope of works includes forecourt decommissioning and fuel tank removal, remediation

by mechanical processes to remove asbestos from soils, and zonal targeted design work which mitigates the need to undertake full source removal of contaminated soils.

All work undertaken is in full compliance with the Environmental Permitting Regulations 2010, operating in accordance with regularly approved site remediation strategy WRAP and the DoW:CoP CL:AIRE Code of Practice.

- Soil sampling
- Site and vegetation clearance
- Bulk soil disposal and haulage
- Cut and fill
- Access routes and compound
- Reducing dig level operations

SOCIAL VALUE

As well as doing our bit to help the environment through our waste division, we're also committed to supporting the local community in which we're based.

Activities and initiatives we are pleased to support include sponsorship of local events and sports teams, community litter picks and Christmas tree recycling.

Anglian has created a green scheme which is delivered in local schools to engage with and educate the next generation.

We are also actively involved with Open Road Training – an automotive workshop and construction training facility in King's Lynn for 14–16 year olds.
